Light Intensity & Refraction Scientific Analysis

Following are the results from the analysis of the illuminance data of the glow sign board of the size 100 mm (24 V).

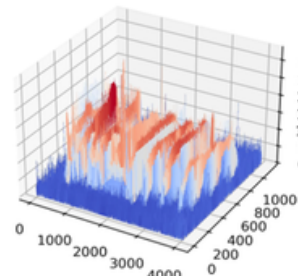

As described in the methodology section LH side, quantities of $1/\text{distance}^2$ were found out and successively plotted following.

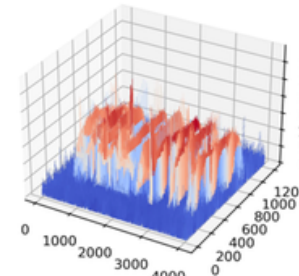

Even Measurement radiation for 50mm board.

Even Measurement radiation for 75mm board.

Even Measurement radiation for 100mm board.
