

ORGANIC WASTE COMPOSTER

- User-friendly solution for converting organic waste into nutrient-rich compost.
- Efficient, Sustainable
- Ensure waste reduction promoting soil health
- Environmental sustainability

Key Features

Fully Automatic

PLC Controlled

Compact Design

Upto 80% Volume Reduction

Easy Operation

Eco Friendly

Low Power Consumption

Odorless

Less Maintenance

Advanced Technology

- Microbial Acceleration
- Rotating Drum
- Automatic Mixing & Aeration
- Smart Controls
- Built-In Safety Features

Applications

- Residential Use
- Housing Societies
- Commercial & Institutional Use
- Agricultural & Horticultural Use
- Municipal Waste Management

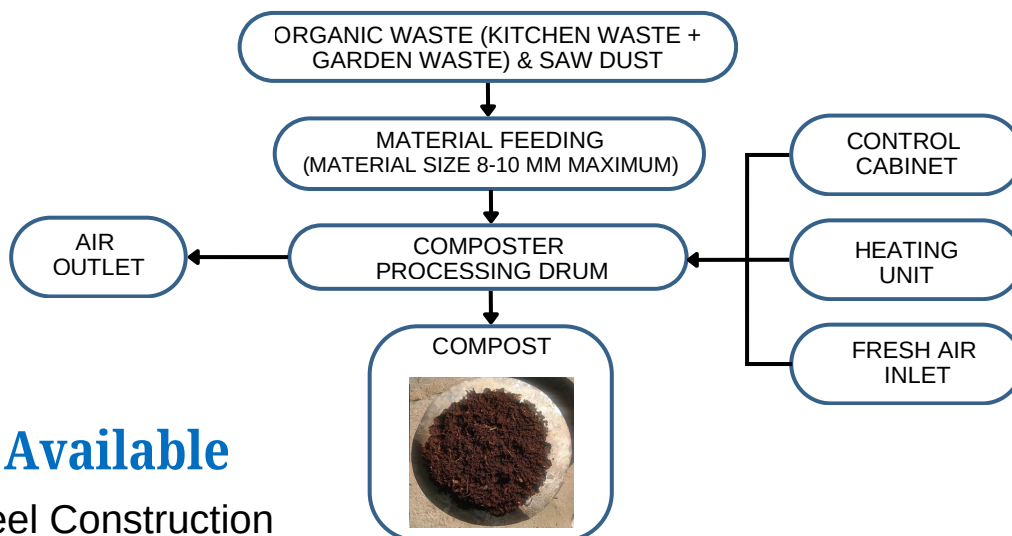

Benefits

- Continuous Process and Batch Type process
- Faster breakdown with aerobic composting
- Controlled environmental conditions inside the drum
- Less processing time (18-20 Days)
- Cost effective

Product Range & Specifications

Model	Input Capacity	Power Consumption (Approx.)	Dimensions (L x W x H) (Approx.)	Processing Time (Approx.)
ECK OWC 20	20 kg/day	1.3 kW	1500mm x 900mm x 950mm	18-20 days
ECK OWC 50	50 kg/day	2.5 kW	2000mm x 200mm x 500mm	18-20 days
ECK WC 100	100 kg/day	4.5 kW	2500mm x 1600mm x 2000mm	18-20 days
ECK OWC 50 BT Batch Type	50 kg/day	2.5 kW	2000mm x 1000mm x 1200mm	24 Hours
ECK OWC 100 BT Batch Type	100 kg/day	3-4 kW	2500mm x 1200mm x 1500mm	24 Hours
ECK OWC 200 BT Batch Type	200 kg/day	4.5-5 kW	2500mm x 1500mm x 1600mm	24 Hours

Process Flow Chart

Options Available

- Mild Steel Construction
- Stainless Steel Construction
(SS material only for the parts that come into contact with organic waste)
- Inbuilt Shredder

Warranty:

1 year for Mild Steel & 3 years for Stainless Steel | Extended warranties available.
